

EARNPART - AN ONLINE PORTAL FOR SHORT TERM JOBS

ABSTRACT:

College students often struggle to afford their education. Many students are suffering from low income, low financial literacy, compulsive spending tendencies, and high debt levels. So, there is a need of money for almost all students studying in college. So, they are trying to grab the opportunity called “internship” in which students can get a chance to put what they are learning into action in real world environment. They can gain both money and experience. But, most of the paid internships are offered only for skilled persons and are only posted by major platforms.

In the same way, working as an intern for a company more than a month will affect the academics of the students. On the other side, companies are struggling to get short term interns.

Our motive is to build a platform in which the students can communicate with companies and can get short term internship based on the skills and knowledge they have acquired from their college. The internships offered by our platform are of maximum of one month which will not affect the academics of the students. All students can access the application irrespective of their domain. They will get stipend which will be helpful to fulfil their needs. Students can also communicate with other students of other departments which will be helpful to improve their communication and to seek help for their projects. The companies will be posting the available offers as a post and the students can acknowledge them through our mobile application.

KEYWORDS: Short term internship, No interference with academics, With Stipend
